

# Business energy storage tender price in Spain 2026

How much does Spain spend on energy storage projects?

The government of Spain is launching two programmes with EUR280 million in grants for standalone energy storage projects, thermal and PHES.

Will Spain get 20GW of new energy storage by 2030?

Spain is targeting 20GW of new energy storage by 2030. MITECO also launched a similarly-sized grant scheme specifically for co-located or hybridised energy storage projects, for which proposals were due in March 2023. Enel Green Power submitted two projects during the first quarter which fit the criteria, totalling 60MWh and 38MWh respectively.

Will pumped hydro energy storage go online in 2026?

One of the two programmes will be directed towards pumped hydro energy storage. Image: MITECO. The government of Spain is launching EUR280 million (US\$310 million) in grants for standalone energy storage projects, thermal energy storage and reversible pumped hydro to go online in 2026.

Why is renewable generation a problem in Spain?

Renewable generation is hindered by declining prices, lack of access to capacity tenders, and project financing challenges, but opportunities lie in PPAs, asset hybridisation with storage, and the approval of the Spanish capacity market.

Is the capacity market a good investment in Spain?

The capacity market in Spain represents an opportunity for the storage sector but cannot be considered the sole basis for investment. Its design must be complemented by a diversification strategy in other electricity markets to ensure the profitability and sustainability of projects.

What is the planification of the electricity transmission infrastructure in Spain?

In this context, the renovation of the electricity transmission infrastructure is subject to the Spanish government's planification, which, under the Spanish Electricity Sector Act, operates on a six-year horizon. This planification system is: (i) influenced by political factors; and (ii) unable to address emerging issues promptly.
