What is a solar bracket system?

Overall, solar bracket systems are a versatile and reliable solution for securely mounting solar panels onto a variety of surfaces, providing a cost-effective and environmentally sustainable way to generate electricity. We are dedicated to helping customers solving their most challenging problems and technological issues.

What is a solar PV mounting system?

These systems are essential components of solar energy systems, as they provide a stable and secure foundation for solar panels to collect sunlight and convert it into electricity. and cost-efficient solar PV mounting system solutions/solar mounting system solutions.

How many production bases does solar power company have?

The company operates three major production bases, encompassing nearly 50,000 square meters of production area. Its main business includes various photovoltaic fixed ground mounting structure, distributed mounting structure, tracking photovoltaic mounting structure, building mounting structure, and distributed power station development, etc.

Can versol mount a photovoltaic power station?

Versol's V-Basic mounting system can be applied to photovoltaic power station in different terrain and environment. The product range includes a wide range of models and styles, and is highly adaptable.

What is the largest single unit PV project in the Philippines?

Signed the largest single unit PV project of 60MW in the Philippines. Japan's first tracker project is officially combined to the grid. Obtained title of Zhejiang Photovoltaic power generation system enterprise research institute. Signed domestic and foreign tracker projects orders over 500MW.
