

Energy storage power supply aging test cabinet price

What is the lithium battery charge and discharge capacity tester?

The lithium battery charge and discharge capacity tester for finished battery pack is a smart and accurate device for battery pack production line. The aging cabinet is mainly used to test the charging and discharging cycles of the finished lithium battery pack. The aging cabinet adopts PLC and industrial-grade touch screen control system.

What is aging cabinet?

The aging cabinet is mainly used to test the charging and discharging cycles of the finished lithium battery pack. The aging cabinet adopts PLC and industrial-grade touch screen control system. The circuit is simple and has perfect alarm protection device.

What are the characteristics of lithium battery aging testing machine?

The lithium battery aging testing machine Characteristic: 1. Real-time monitoring system operating status, with complete alarm protection device. 2. In network mode, you can connect automatically without manual connection. 3.

What is the purpose of the 18650 battery charge and discharge capacity analyzer?

The 18650 battery charge and discharge capacity analyzer is suitable for finished battery pack, include: power battery products, emergency power supply finished products, electric motorcycle battery... The lithium battery aging testing machine Characteristic: 1.
