Description. Quantum Generators - addon to IndustrialUpgrade, adds 6 quantum generators to the game, from photon to quark. You can change the energy generation in the generator interface itself. These mechanisms replace solar panels, but have a heavier craft

The Solar Panel from IndustrialCraft 2 is an upgraded version of the Generator that produces EU from the sun. The Solar Panel will only create EU during a clear day, and if there are no opaque blocks above it. It will create 1EU/t. You can determine whether or not your solar panel is working by right clicking on the block, in the GUI there is a sun icon, if it is lit the panel is working and ...

The Advanced Solar Panel is part of the Advanced Solar Panels add-on for IndustrialCraft 2 generates 8 EU/t during the day and 1 EU/t during the night.. The Advanced Solar Panel is an upgrade from the regular Solar Panel has an internal buffer that can hold 32000 EU and charge 4 items simultaneously.

Solar Panels are generators that utilize the energy of the Sun to generate EU and thus require an unobstructed view of the sky (you can place glass over it). This means that ...

The Generator can store up to 4,000 EU in its internal battery, and deliver EU to connected Machines at a rate of 10 EU per tick (EU/t). Keep in mind, there are 20 ticks per second in Minecraft. Packet size is 10 EU (EU-P). RE-Batteries, BatPacks, the Electric Jetpack and Powered Tools can be charged in the top slot of the Generator GUI, as well.

The Quantum Generator is a block from the Advanced Solars mod. It is a creative-only block, as it does not have a crafting recipe, and cannot be obtained in a survival playthrough. It is intended for map-makers and server admins that need a specific amount of permanent Energy Units. The energy that it creates and outputs can be fully customized, as well as the packet size that it ...

The Solar Generator is a generator added by Mekanism produces approximately 18 RF/t, 46.54 J/t, 4.65 EU/t or 19 T/t during daylight hours and a very small amount when it is raining. It can be used by itself or as a component to craft the Advanced Solar Generator. The Solar Generator has a small internal buffer of 9,600 EU so use of an energy storage cell is strongly recommended.

The Kinetic Generator will transform kinetic energy to electrical energy. It is most commonly used together with a Kinetic Wind Generator or a Kinetic Steam Generator. The Kinetic Generator produces 1 EU for every 4 KU. Recipe

Items and machines in IndustrialCraft 2 are grouped into tiers based on the maximum EU it can output or receive per tick (EU/t).. Powering a machine or storage unit with too much EU/t will result in the machine exploding.

Regardless of the cooling solution, an Industrial Turbine will be the actual power generator. Important (this applies to both cooling solutions): the Industrial Turbine must have Saturating Condensers in order to be able to condense steam into water and pipe that water back to the reactor cooling loop. The max water output from a turbine can be ...
