

Where can I find official government estimates for Ethiopia?

For official government estimates, please refer to the CSA's webpage. The Ethiopia Socioeconomic Dashboards allow users to access official household survey data at the regional level to analyze socioeconomic outcomes across the country in a nuanced way to inform program design and monitoring.

How much does it cost to build a house in Ethiopia?

The cost of building a house in Ethiopia is influenced by multiple factors, including the type of house, its location, the building materials used, and labor expenses. Generally, the average cost of constructing a new home ranges from \$100 - \$300 per square meter. For example: 1. Size of the House Increased size leads to increased costs.

What are Ethiopia's socioeconomic dashboards?

The Socioeconomic Dashboards use information available in the two latest rounds of the Ethiopia Household Consumption and Expenditure Surveys (HCES) and Welfare Monitoring Surveys (WMS) of 2010/11 and 2015/16 by the Ethiopia Central Statistics Agency (CSA). The indicators are World Bank staff estimates based on official government data.

How many socioeconomic indicators are there in Ethiopia?

The region-level visualizations provide a comprehensive profile of 62 socioeconomic indicators across nine regions and two city administrations, providing comparable trends of socioeconomic indicators in Ethiopia. The indicators span topics such as poverty and inequality, access to services, demographics, education, gender, and food security.

How much does it cost to build a house in Addis Ababa?

We will also assume that you want 3 bedrooms, 2 bathrooms and 1 living room. The average size of this type of house will be about 180 square meters (18m x 9m). The next step is getting the construction permit from Addis Ababa City Hall (AACC). This costs about \$70 US dollars and takes about 4 weeks before they give you permission to start building.

How does Eri calculate cost of living?

Professionals should subscribe to ERI's Assessor Series. The cost of living score is calculated based on accumulating the cost of food, transportation, health services, rent, utilities, taxes, and miscellaneous. Ethiopia, officially the Federal Democratic Republic of Ethiopia, is a landlocked country located in the Horn of Africa.
