How do I write a solar project proposal?

Comprehend and layout the client's energy needs and goals for their solar project. Clearly enumerate the services you offer, such as site assessment, system design, and installation. Present a detailed timeline of the installation process, including key milestones and deadlines.

Suppose, in our case the load is 3000 Wh/per day. To know the needed total W Peak of a solar panel capacity, we use PFG factor i.e. Total W Peak of PV panel capacity = $3000 / 3.2$ (PFG) = 931 W Peak. Now, the required number of PV panels are = $931 / 160W$ = 5.8. This way, we need 6 numbers of solar panels each rated for 160W.
