

Smart lock solar panel

The solar panel on the front of the lock recharges the batteries if the lock is installed in direct or indirect sunlight. Each battery can last up to 9 months on a single charge.

A rechargeable battery is a great idea for a smart lock. Mounting a solar panel on the other side of the lock to trickle-charge it is an even better one. Using the Array by Hampton with Alexa.

A spare battery is included with the lock so you don't have to leave the lock unpowered: a great idea that I wish more smart locks adopted. At the bottom of the back panel is the manual thumb ...
