How far can a Wall Connector charge a Tesla?

For Tesla vehicles, Wall Connector provides up to 44 miles of range per hour of charge. For other electric vehicles, refer to your vehicle manufacturer's guidance to determine your charging speed. Wall Connector is compatible with most electric vehicles including Tesla vehicles and other electric vehicles.

Does Tesla wall charger Gen 3 work with solar?

I have read in a few places that the Tesla Wall Charger Gen 3 might play nicely with Solar if you have a Powerwall. It doesn't. It's an often-requested feature; Tesla has all the data they need to make it happen (The GW2 is very chatty to the mothership via the 'net, and the TWC3 is also on the 'net) but so far they have not implemented it.

Can a Tesla car be charged via a Wall Connector?

The Wall Connector is recommended for home charging because it offers the highest charging rates and speeds and maximum convenience. However, a Tesla vehicle can also be charged via the Mobile Connector at normal household sockets. What if I have an electric vehicle not produced by Tesla? The Wall Connector will charge all other electric vehicles.
